## DID YOU KNOW?

Every year it seems to happen. You go outside and try to use your garden hose for the first time after a long winter break only to find that it leaks or is cracked beyond repair - necessitating the purchase of a new hose. So what do you do with the old hose? Great question.

Let's start with what you don't do: **DO NOT place the old hose in the recycling bin.** It can muck things up. In the recycling world, garden hoses are what are known as "**tanglers.**" Tanglers include hoses, along with ropes, chains, and cords.

A single tangler can cause a massive disruption as they are known to tangle up equipment, **potentially resulting in safety issues for workers and mechanical issues for machinery.** All this leads to downtime and extra expense at the Tehama County/Red Bluff Landfill.

**Here are some suggestions for your old water hoses:**

- **Use pieces to cover the blades on saws and other cutting tools** by cutting off pieces of the hose and then slitting them down one of the sides.
- **Turn it into a soaker hose** by puncturing it with holes.
- **Protect stabilized trees** by sliding a piece of hose over the rope you're using to secure the tree; this prevents the rope from cutting into the tree.
- **Make chains and handles easier to grip** by sliding sections of hose over the metal handles on buckets or metal chains on swings.
