## DID YOU KNOW?

The average American student generates 240 pounds of waste per year... and that's just at school.

It feels good to start the school year off with a lot of new stuff, but all that new stuff requires trees, water, energy and other resources, and generates loads of waste that you don't see from manufacturing, packaging and transporting. This year, make a difference, and save some money, by cutting down on school-related waste. Not sure how? **Consider this:**

- **Choose to reuse.** Evaluate what can be reused from last school year. Spruce up old binders and use up blank pages in notebooks. Paper that was only used on one side makes great scratch paper.
- **Buy wisely and buy recycled.** Make a list of what you need before you head to the store and stick to it! Choose products without a lot of packaging and make sure you buy recycled. After all, it's not recycling if nobody buys the end (recycled) product.

- 
- **Cut down on lunch waste.** According to New York's Department of Environmental Conservation, a single student produces 45-90 pounds of disposable garbage from lunch waste per year! Plus, the National School Lunch Program reported that wasted food costs more than \$600 million per year to manage (not to mention the lost nutritional value). This year, strive for zero-waste lunches by using reusable containers and saving leftovers for an afternoon snack.

### **Questions?**

Please call the Tehama County Solid Waste Management Agency at 528-1103, visit <http://www.tehamacountylandfill.com> or email us at [tehamacountyrecycles@co.tehama.ca.us](mailto:tehamacountyrecycles@co.tehama.ca.us).

As always, please **do not forget to recycle!**  
It's good for the County and good for the wallet.
